27 Charles Street
North Andover, Massachusetts 01845

Alison McKay
Interim Conservation Administrator

Telephone (978) 688-9530
Fax (978) 688-9542

Dear Potential Applicant(s):

To better assist you in your filing application, the Conservation Department has provided a list of local Wetland Consultants, Engineers, and Surveyors that are familiar with the North Andover filing application process, Wetland Bylaw and Regulations. The applicant may choose to contract with any of the firms provided or may choose to contract with any other professional firm of the appropriate nature on their own. **It is highly recommended that such professionals be contacted for filing preparation services**, as the Conservation Department is responsible for process and review of project applications only.

Although, the Conservation Department has worked with all of these firms in the past, we can not guarantee their performance or lack thereof, based upon the applicant's specific needs (i.e. – timeframe for filing deadline submission, costs, etc.). The Conservation Department and/or The Town of North Andover do not hold any responsibility for any hardships or setbacks incurred to the applicant as a result of the contracted firm's performance.

The Department looks forward to working with you to assist in project application procedures and reviews.
